

Healing Bridge

PHYSICAL THERAPY

*Cross the Bridge to Better
Health & Wellness*

*"One hundred years
from now it won't
matter what kind
of car I drove,
what kind of house
I lived in, how much
money I had in
the bank, nor what my
clothes looked like.
But the world may be a
little better because
I was important in
the life of a child."

*I feel fortunate to
have been able to identify
and pursue a career
in something I have a
strong passion for.*

*It was my goal in high
school to become a
physical therapist and I
knew from the beginning I
wanted to work with
children.*

*I now know that making a
difference in the lives of
children it is part of my
life's purpose.*

As a mother of three small children I can relate to the many challenges and joys of parenting experienced by the families I work with. My husband and I enjoy exploring the great outdoors of Central Oregon and sharing many "first time" experiences with our children.

Christen Eby MPT

*Helping Children Achieve
Their Fullest Potentials*

I am passionate about the field of physical therapy and especially pediatric physical therapy. The smiles received from children are my favorite reward for what I do. Each child is unique, and it is my goal to understand them and find what motivates them, which makes their therapy fun and meaningful. For me there is nothing greater than to be a part of helping children be the very best they can be. It is my goal to help each of the children I work with to achieve their fullest potentials.

As a physical therapist I have had the privilege of working with children in various treatment settings including outpatient clinic, home, and school based settings. At Healing Bridge I am thrilled to be able to provide therapy at the clinic, in the warm water pool, in homes, and on horseback.

Some of my continuing education has included:

- Hippotherapy Equine Skills and Treatment Principles Level 1
- Neurodevelopmental Treatment Approach to Baby Treatment
- Neurodevelopmental Treatment in a School Setting
- Pediatric NDT Gait
- Neurotherapeutic and Sensory Techniques for the Special Needs Client
- Brain Development and Early Childhood
- Concepts and Guidelines in Baby Treatment

Education:

- Master of Science: Physical Therapy, Western University of Health Sciences, Pomona, CA
- Bachelor of Science: Speech Communication, Portland State University, Portland, OR
